Library Resources and Services for Faculty

Supporting Your Students (Undergraduate and Graduate):

- **Academic Skills Development** - various workshops, online resources, and consultations to help students develop academic skills (e.g., study skills and research skills), available for both undergraduate and graduate students
- **Writing Help Centre** - assistance provided at all stages of the writing process via one-to-one online and in person, workshops, and online resources
- **Math & Stats Help Centre** - drop-in tutoring for help with U of S courses for all current students
- **Library spaces** – seven locations; group and individual study spaces; late night study at the Murray Library
- **Assignment Planner** - step-by-step online tool to assist with the research and writing process

Supporting Your Teaching:

- **Collections** - extensive and growing print and online collections, search tools etc.
- **Copyright** - education sessions, presentations, and consultations; administers university’s copyright compliance program and assists with acquiring copyright permission and licenses
- **Reserve collection** - high demand materials for student use with short loan periods
- **Research guides** - starting place for research, writing and citing help, and more. Research guides can be directly embedded within your Blackboard courses
- **Information Literacy** - outlines how the Library can support you and your students develop information literacy skills; includes the Information Literacy Instructional Toolkit, an online resource to help you teach students how to approach research assignments and develop critical evaluation skills
- **Liaison librarians** - offer in-class instruction and research consultations with students

Supporting Your Research:

- **Scholarly Communication** - website providing resources available in the areas of Open Access, predatory publishing, and research metrics.
- **Liaison librarians** - offer research assistance, select materials for the collection, etc.
- **Collections** - extensive and growing print and online collections
- **Request a Purchase** - suggest items you would like the Library to purchase
- **Interlibrary Loans** - request resources from other libraries when unavailable here
- **Copyright** – website includes FAQs about author rights, and information about intellectual property, conferences, and data and statistics
- **Research Data Management** - introductory guide to managing, organizing, storing, and sharing your research data
- **University Archives and Special Collections** - preserves and makes available archival and other unique materials for research and teaching
